Work from Home Package

airespring®
Cloud, Fully Managed and Connected

Equip Your Remote Employees for Long-Term Success with AireSpring's SD-WAN Work from Home Package

Without VeloCloud @ 2% Packet Loss

2% Packet Loss with VMware SD-WAN

AireSpring's Work from Home Package Provides the Missing Link that Others Don't – SD-WAN!

SD-WAN can optimize connectivity over residential broadband mitigating voice and video quality issues and slow application performance. Equip remote employees with the essential tools they need to better connect, collaborate, and communicate effectively and securely over residential broadband!

Give them more control over the unpredictable Internet and keep your remote employees functioning at optimal levels.

AireSpring goes the extra mile with our Work from Home solution by bundling our AirePBX UCaaS cloud communications solution with our VMware SD-WAN by VeloCloud 510 edge device to ensure remote employees connect, collaborate, and communicate successfully.

Here's what's included:

- **VMware SD-WAN by VeloCloud Model 510 Edge Device**
  10Mbps Tunnel License included

- **AirePBX UCaaS Enterprise Seat**
  Includes unlimited outbound calling &
  500 Toll Free minutes
