

Monitor Your Network and Fix Potential Problems

As part of the AireSpring Advantage™, our AireNMS network monitoring service enables you to rest assured knowing that your WAN network is being monitored day and night worldwide by the AireSpring Network Operations Center (NOC). Trouble tickets are proactively opened on your behalf in the event of a network issue or alert, often before your IT team is even aware there is a problem.

AireNMS makes it easy to spot and track issues thanks to instant operational health monitoring, which reduces the cost and time needed for troubleshooting. The single pane of glass view enables your IT team to view exactly what the AireSpring NOC sees on your WAN network. Best of all, it's included FREE for AireSpring provided routers and gateways.

FEATURES

- 24/7 real-time WAN monitoring by the AireSpring Network Operations Center (NOC).
- Tickets proactively opened on behalf of customers in the event of a network alert, often before your IT team is aware of the issue.
- Access to the system from anywhere using only a standard web browser with no software clients to download or install.
- A variety of real-time and historical reports with the ability to drill-down into data, including:
 - Live and historical statistics for service/interface management.
 - CPU utilization for Adtran and Cisco routers.
 - Round trip latency report.
 - Interface bandwidth utilization statistics.
 - Historical interface bandwidth utilization graph.
 - Interface error check.
- Outstanding personalized support from AireSpring's world-class network support team.
- Provided free to customers utilizing AireSpring provided WAN connectivity in conjunction with AireSpring routers or gateways.

BENEFITS

AireSpring provides consolidated performance reports that let you review live and historical statistics for your router, WAN network, and more all through one easy-to-use web portal. An at-a-glance overview provides the immediate status of your network services, with the ability to drill-down into specific areas for more data, while the simple web interface is available from anywhere without having to download and install software.

The AireNMS network monitoring service provides proactive 24/7 real-time WAN monitoring and alerting for AireSpring provided routers and gateways.
