

A Key System with cloud-hosted, full-featured functionality suited to the small business

Many small businesses are reluctant to move away from outdated, traditional key systems in favor of more efficient cloud hosted PBX solutions that do not support their method of operation. So, they continue to use risky, aging key systems that are in their end-of-life (EOL) stage, making them costly or impossible to repair and maintain.

AireSpring has a cloud-hosted key system that solves this dilemma.

AireSpring's new **Hosted Key System**, provides all the functionality found in traditional key systems, but now with the added reliability of cloud communications. Users can avoid the need to purchase or maintain on-premises equipment, as everything is modern and in the cloud.

What is a Key System?

Key systems are phone systems designed to serve the needs of small businesses or branch offices. Contrary to a PBX system where each user has an individual phone number or DID, key systems share common lines across all stations or extensions, and all phone lines appear on every phone. The phones carry multiple buttons—or keys—that light up when a line is in use. There is typically a pilot number for all phone lines. Key systems are often used in retail settings, such as auto parts stores, as well as in medical offices and clinics, where any staff member can see the same blinking line and pick up the call from any phone, with no need to transfer the call or to use call or park orbits.

- **Sophisticated Business Features**—AireSpring's Cloud Hosted Key System provides the features businesses know and appreciate, with added functionality and the convenience of cloud hosting, including: 3-way calling and music-on-hold, consistent shared lines across all phones, direct intercom paging to a specific extension, page all function, up to 10 shared key system lines and up to 20 extensions.
- **Important New Cloud Hosting Advantages**—Eliminates the need for on-premises hardware and maintenance, resulting in dramatic cost savings; upgrades to latest features and functionality happen in real time; built-in disaster recovery enables business operations to continue without interruption; premium AireSpring Advantage support remains accessible 24/7/365.

USE WITH AIRESPRING'S IP PHONES

Mitel 6869 SIP Phone

Designed for heavy-demand phone use, a robust device with maximum functionality.

- HD wideband audio
- 10 key system lines and five programmable context-sensitive system keys
- 480x272 pixel color backlit 4.3" LCD display
- Native DHS/G/EHS headset support
- Power over Ethernet (PoE) Class 3

Mitel 6867 SIP Phone

Fully-featured desktop phone for heavy phone and network requirements.

- Large 3.5" color backlit LCD display
- 6 key system lines
- 4 programmable context sensitive keys
- Gigabit throughput for PC connectivity
- Flexible headset support (wireless, DHS/G/EHS and USB)
- Power over Ethernet (PoE) Class 2

Mitel 6865 SIP Phone

Flexible phone with familiar functions and SIP technology
Included Free with a 3-year contract

- Large 3.4", 128x48 pixel LCD display
- 6 key system lines
- Gigabit throughput for PC connectivity
- Flexible headset support (wireless and DHS/G/EHS)
- Power over Ethernet (PoE) Class 2

BENEFITS OF AIRESPRING'S HOSTED KEY SYSTEM

Surprisingly affordable—Local, long distance and international calls will be less costly thanks to lowest cost internet calling. Save on three counts—lowered costs for service, hardware and the time not spent managing a complex system.

Reduces capital outlay—Avoid the cost of needless and expensive, on-premises key system hardware. Save up to 90% over the typical start-up costs of a traditional key system.

Full Key System functionality—AireSpring's Hosted Key System supplies features demanded by businesses who are accustomed to key system functionality, like consistent shared lines across all phones, and direct intercom paging to a specific extension, plus additional features like call management and music on hold. Gain important new cloud hosting advantages including: no need for on-premises hardware and maintenance, with resulting cost savings; real-time upgrades to latest features

and functionality; built-in disaster recovery, and premium support with AireSpring Advantage services accessible 24/7/365. Supports up to 10 shared key system lines and up to 20 stations.

Easy-to-use and simplified administration—Easy-to-use online account management tools save on operational costs by streamlining system administration. Free up employees' valuable time to manage other things.

BENEFITS OF THE AIRESPRING ADVANTAGE™

White Glove Service

AireSpring pre-configures and ships equipment directly to the customer's location. A trained technician is dispatched to perform professional on-site installation and testing of IP phones, routers and switches to ensure that the communications system works perfectly.

Eliminate Finger Pointing Between Providers

By having all services delivered by a single vendor on a fully managed network with AireSpring Managed Connectivity, avoid the finger pointing and blame game that occurs when

cloud communications services and connectivity are delivered by different vendors.

Reliable and Diversified Network

AireSpring's redundant network provides true network diversity and supports disaster recovery options, to ensure business continuity.

Free Advanced IP Desk Phones

Why pay for phones when you can get them for free? AireSpring includes FREE next generation SIP business phones with a 3-year contract. We also have plenty of upgrades, including video or touch screen phones, to keep every business satisfied.

Escalation List Up to Our CEO

We stand behind our service 100%! In fact, we're so committed to ensuring complete satisfaction that we provide all of our customers with an escalation list providing access to our executive management all the way up to our CEO.
