

Managed Connectivity

Simplify the complexities of integrating cloud communications solutions to IP networks

Managed Connectivity from AireSpring is a revolutionary new way to simplify the complexities of integrating cloud communications solutions into IP networks. You need converged voice, video, and data solutions that you can count on, but don't have the time or resources to manage, monitor, or troubleshoot a complex multi-vendor solution. AireSpring has the answer with end-to-end managed connectivity fully integrated with our award-winning cloud communications suite to equip your business with fast, secure, and reliable services.

What sets AireSpring Managed Connectivity apart from other solutions is the unique value of the AireSpring Advantage. We operate, manage, and maintain our own advanced IP network and have years of experience we leverage to remove the risks and complexity of integrating cloud communications solutions with today's IP networks.

Features

- Fully managed cloud communications suite including:
 - Cloud Business Phone System
 - Cloud Hosted Contact Center
 - SIP Trunking
 - Firewall Security Services
 - Failover Services
- Geo-redundant diversity built into the network
- Optional WAN failover available

Contact an AireSpring authorized partner today to find out how Managed Connectivity can help you integrate cloud communications solutions into your network.

THE AIRESPRING ADVANTAGE™

Fully Managed Network with QoS

All the features in the world won't make a difference if your communications services are dependent on a public internet connection beyond your control. Even an SLA (service level agreement) cannot ensure or guarantee quality and reliability, or prevent latency across the public internet, which can result in poor call quality and unreliable service. We provide service over our fully managed, owned and operated IP network with end-to-end Quality of Service (QoS) for exceptional voice quality.

Eliminate Finger Pointing Between Providers

By having all services delivered by a single vendor on a fully managed network, you avoid the finger pointing and blame game that occurs when you have cloud communications services delivered by a different vendor than your connectivity.

Largest Available Coverage

From Somerset, CA to Madill, OK to Moravian Falls, NC to New York City, we cover more locations than anyone else on our network.

FREE On-Premises Enterprise-Grade Router/Gateway

We provide a fully managed, enterprise-grade router/gateway to manage VoIP and Data traffic, (available with AireSpring Managed Connectivity).

Reliable and Diversified Network

AireSpring's geo-redundant network provides true network diversity and supports disaster recovery options, helping to ensure business continuity.

Online Access via our AireCare™ Customer Portal

Our advanced online billing reporting portal provides 24/7 access to your billing and service details.

Free 24/7 ProactiveWAN

Network Monitoring Service

AireSpring's Managed Connectivity services include free 24/7 professional monitoring with the AireNMS network monitoring service. Our NOC proactively monitors your network to pinpoint and fix potential problems before they affect your business.

Personalized Service

We back you up with outstanding customer service, featuring one bill and a single point of contact for all your service needs.

Escalation List Up to Our CEO

We stand behind our service 100%! In fact, we're so committed to ensuring complete satisfaction that we provide all of our customers with an escalation list giving you access to our executive management all the way up to our CEO.

AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."
