

SIP Trunking Fast, Scalable, Affordable, and Available Everywhere

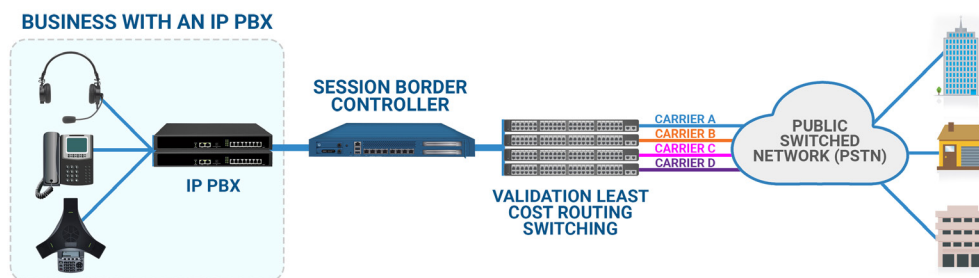

SIP Trunking is the solution your business needs to enable your IP PBX or advanced unified communications (UC) platform. Session Initiated Protocol or SIP empowers your voice and data to work together to produce trusted, reliable and flexible cloud communications that increase employee productivity and bottom-line profitability.

AireSpring delivers the flexible connectivity options you need to move your communications to the Cloud. You get the quality and assurance of our fully managed, owned and operated advanced IP network, which delivers high definition (HD) audio and superior service and uptime without the costs associated with legacy technologies. Our geo-redundant network provides superior business continuity with failover support. In the event of an outage in one region, or with a specific carrier, your calls can be rerouted over our IP network through another AireSpring data center to avoid disruption to your business.

AireSpring's carrier-grade SIP network processes over 4.5 billion calls per month.

AireSpring SIP Trunks provide a secure connection to your UC solution. SIP Trunks are exposed to the Internet. That's why it's critical that your paths run on a secured network. AireSpring uses Integrated Transport Layer Security (TLS) and Secure Real-time Transport Protocol (SRTP) encryption to protect your communications.

On-demand scalability enables you to add additional trunks as your business grows. Number Porting anywhere means you can keep your existing numbers and get new DIDs anywhere in the country with AireSpring. Additionally, AireSpring can optimize your existing broadband circuits or provide new managed broadband circuits for exceptional voice quality.

FEATURES

- ▶ Flexible and competitive pricing options for solutions that meet your individual needs
- ▶ Full suite of advanced communications features available, including DIDs, TollFree, e911, international calling, directory listing, and number porting
- ▶ Rapid activation gets you up and running faster
- ▶ Fewer circuits, less interfaces, greater efficiency, and more cost savings
- ▶ Effortlessly scalable instantly or over time, so you only pay for what you need
- ▶ Enjoy the benefits of AireSpring's carrier-grade network that processes over 4.5 billion calls per month
- ▶ Integrated Transport Layer Security (TLS) and Secure Realtime Transport Protocol (SRTP) encryption options available to protect your communications
- ▶ High Definition (HD) audio support
- ▶ Support for **Microsoft Teams** Direct Routing enables Teams users to make phone calls via AireSpring SIP Trunks

The AireSpring Advantage™

- **Fully Managed Network with QoS:** Our fully managed, owned and operated IP network with end-to-end QoS provides exceptional voice quality. Multi-carrier and multi-network redundancy delivers maximum security and uptime (available with AireSpring Managed Connectivity).
- **Reliable and Diversified Network:** AireSpring's geo-redundant network provides true network diversity and supports disaster recovery options, helping to ensure business continuity.
- **Largest Available Coverage:** We cover more locations than anyone else on our network, with the largest combined footprint.
- **AireCare Online Customer Portal:** Benefit from convenient real-time rerouting and management of Toll-Free numbers and DIDs. Control services with percentage allocation, manual and time-of-day routing. Update switches in real time and easily move traffic between locations, for a key component in disaster recovery. Easily view and manage account billing and payment services, view reports and access online support.
- **Escalation List Up to Our CEO:** We stand behind our services 100 percent! We're so committed to ensuring complete satisfaction that we provide all our customers with an escalation list giving you access all the way up to our CEO.
- **Experience and Stability:** AireSpring is an established name in the industry that you can count on for your communications. We've been around for over 19 years as a profitable and debt-free company and currently process over 4.5 billion calls per month on our carrier-grade network.
- **Personalized Service:** AireSpring delivers outstanding customer service, featuring one bill and a single point of contact for all your service needs.
- **Support for Microsoft Teams Direct Routing:** Microsoft Teams customers can make calls via AireSpring SIP Trunks and retain E911 support, port new and existing phone numbers, and obtain new DIDs nationwide.

AireSpring has received numerous industry awards for "Product of the Year," "Best Telecom Deal," "Members Choice Top Reseller," "Best in Show," and "Top Channel Program."
