## Transferring Live Calls to Voicemail

On select phone models, a **xfrVM** softkey is presented on the phone when a call is active on that device. Press this softkey, and enter an extension terminated by **#** to transfer a call directly to that extension's voicemail box.

## Parking Calls

To park a live call:

1. Select **Park**.
2. Listen to the message that identifies the extension the call is parked on.
3. Notify the intended recipient(s).

To pick up the parked call, the recipient dials the extension that the call was parked on.

## Forwarding Calls

8x8 recommends using your Virtual Office desktop app instead of phone-based call forwarding so your call forwarding instructions are stored online instead of on the phone. If you set your call forwarding rules on your phone, they will not be in effect if your phone is disconnected from an Internet connection.

To enable online call forwarding in Virtual Office:

1. Log in to your Virtual Office desktop app.
2. Go to **Settings > Account Settings > Call Forwarding** in the **More ●●● tab**.
3. Update your call forwarding rules, and click **Save**.

## Recording Calls

Recording calls is a subscription-based feature that can be managed via your 8x8 Virtual Office desktop app. You can record all calls, or record selective calls by turning call recording on and off using your **CallRecord** softkey. This softkey is only available to you if your subscription allows call recording.

- Press the **Rec** softkey during a call. You will hear an announcement that call recording has started.
- Press the **Rec** softkey key again to stop recording. You will hear an announcement that call recording has ended.

## BLF – Busy Line Field (If Enabled)

Available as an optional 8x8 Power Keys add-on function, BLF keys monitor the status of other phones:

- When a phone that a BLF key is monitoring rings, the BLF key flashes.
- When a phone that a BLF key is monitoring is busy, the BLF key lights up.

**BLF Pickup:** When a phone that a BLF key is monitoring rings, answer (intercept) the call by pressing the BLF key.

**BLF Speed Transfer:** If you are on a live call, press a BLF key to instantly transfer the call to the phone that the BLF key is monitoring.

**BLF Speed Dial:** To instantly call a phone that a BLF key is monitoring, press the BLF key.
