

AirePBX Enterprise

Cloud Phone System for the Mobile Workforce

AirePBX Enterprise is a fully-featured cloud phone system built with special features to support a dynamic, mobile office environment.

Team Presence

Check on the availability status of your coworkers to see whether they are on the phone, at their desk, in a meeting, and more. Set 'Call When Available' to automatically call others once they are off the phone.

CRM Integration

Incoming calls automatically generate CRM screen pops so users can easily and instantly review customer information. Compatible with any major CRM including Salesforce and Sugar, with custom integration available.

Internet Fax Number

Free fax numbers are provided for each seat of AirePBX Enterprise. Gain the ability to send and receive faxes on any device.

Unified Communications

Work from your desk phone, smartphone, tablet, desktop computer, or laptop. Seamlessly switch between your office and mobile devices during live calls for ultimate unrestricted mobility.

Video Calling

Get Managed Connectivity and enjoy the benefits of the AireSpring Advantage.

White Glove Service

AireSpring pre-configures and ships equipment directly to your location. When you choose our professional installation service, we dispatch a trained technician to perform professional on-site installation and testing of IP phones, routers and switches to ensure that your communications system works perfectly. (Not available when purchasing Self Install Seat types.)

Eliminate Finger Pointing Between Providers

By having all services delivered by a single vendor on a fully managed network, you avoid the finger pointing and blame game that occurs when you have cloud communications services delivered by a different vendor than your connectivity.

Reliable and Diversified Network

AireSpring's redundant network provides true network diversity and supports disaster recovery options, allowing you to ensure business continuity.

Optional Advanced Features

MaX Meeting & Webinar

MaX Meeting, a 100% cloud-based conferencing application, is available as an add-on option with AirePBX Enterprise. A tested and proven Enterprise Video Conferencing and Collaboration platform based on the industry-leading Zoom Enterprise platform, MaX Meeting provides a comprehensive collaboration environment that scales from SMBs to Fortune 500 businesses without the need to install any hardware infrastructure or applications onsite.

A great complementary add-on to MaX Meeting, MaX UC Webinar is designed so that the host and panelists can share their video, audio and screen. Attendees have the ability to interact via Q&A, chat, and answering polling questions. MaX UC Video Webinars excel in quality, reliability, scalability, and affordability. Seeing the presenters makes a world of difference in building personal connections, engagement, and trust.

Automatic Call Recording

Automatically record and save all of your calls. Recordings can be easily reviewed and exported from our simple online portal.

AireTXT

Send and receive SMS messages using your PBX number or short codes and respond using your email account.
